Tiny Tapeout DIP Dock

Simple docking station for TT ASIC DIPs.

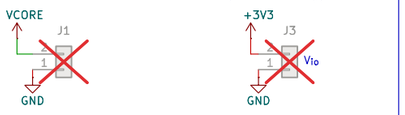

Provides the same form factor and interface--piano DIP and 7-segment, manual clock and reset, pmod connectors--as the Tiny Tapeout demoboard for GF DIP breakouts.

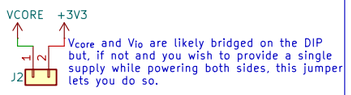

Pop in the DIP, with the USB connector side facing the pmods, plug into computer/USB power supply (or power using connectors on left), and go.

Power

Expected to be powered via the DIP USB, but the headers here allow for external power to be applied.

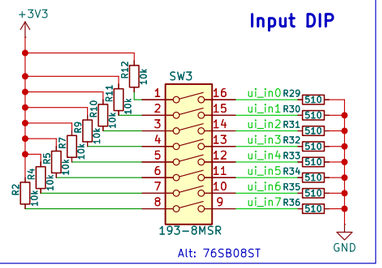

V_{core} and V_{IO} are likely bridged on the DIP but, if not and you wish to provide a single supply while powering both sides, this jumper lets you do so.

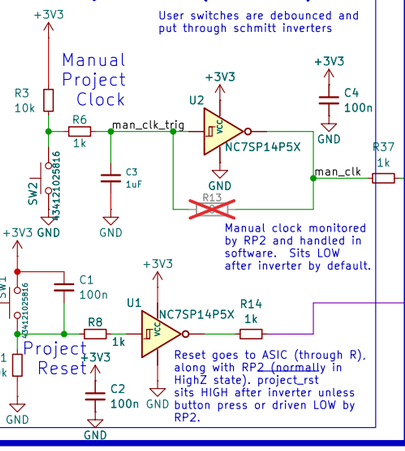

User Input

Input DIP

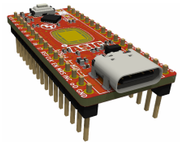

Momentary Switches (debounced)

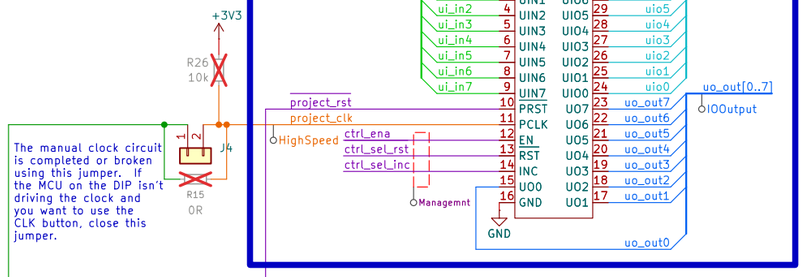

User switches are debounced and put through schmitt inverters

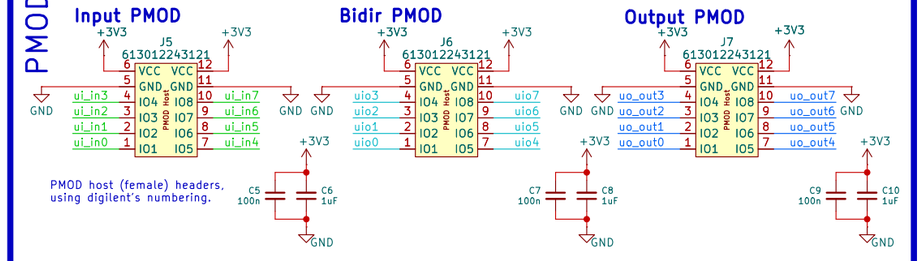

TT ASIC DIP

Headers/ZIF connector for the ASIC DIP board.

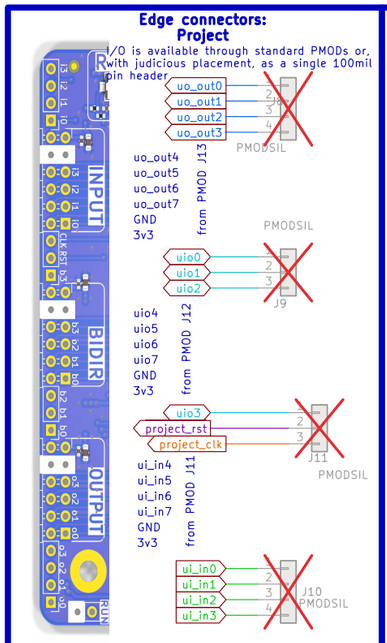

PMOD

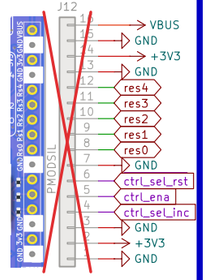

Edge connectors: Project

I/O is available through standard PMODs or, with judicious placement, as a single 100mil pin header.

Edge connectors: Management

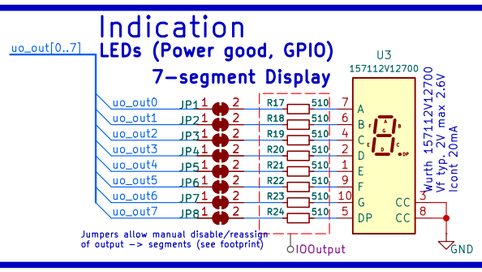

Project MUX, power and reserved pins available on this header

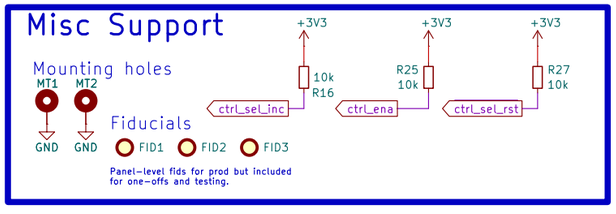

Indication

LEDs (Power good, GPIO)

7-segment Display

Misc Support

(C) 2026 Pat Deegan
